

Project Planning Guide

Getting Started is Easy

The more information you can provide, the more accurate your proposal will be. Don't worry if you don't have every detail—our team will help guide you through the process.

Before You Contact ADMI, It Helps to Know:

Project Location

Provide the project address or general location.

Project Goal

Tell us what you're trying to accomplish—construction documentation, inspections, real estate marketing, mapping, event coverage, or something unique.

Desired Timeline

When would you like the flight completed, and when do you need your deliverables?

Deliverables

Let us know what you need, such as photos, video, mapping, or customized deliverables.

Site Information

Share any known hazards, access instructions, restricted areas, or special requirements that may help us plan a safe and efficient flight.

Don't Have All the Answers?

That's okay. Most clients don't.

We'll work with you to define the project scope, recommend the right services, and build a solution that fits your goals and budget.
